

## Product Specifications

| January 2020

**Product Name:** Food Safe Metal Pen

**Product Description:** The Food Safe Metal pen contains no detachable parts and is fully metal detectable, making it ideal for hygiene critical food and pharmaceutical production areas where foreign body contamination is not an option.

The body of the pen is manufactured from stainless steel, with a brass nib and an optional steel clip. The pen contains a standard plastic ink cartridge which is 100% sealed into the body, even with applied force the pens end plug will not detach.

**Pack Size:** 50

**Pack Weight:** 0.55 Kg

**Product Colour:** Metallic

**Ink Colour:** Blue & Black

<b>Order Codes:</b>	Blue Ink With Clip	8900012-M
	Black Ink With Clip	8900016-M
	Blue Ink Without Clip	8900002-M
	Black Ink Without Clip	8900006-M

**Product Advantages:**

- ✓ Detectable by conventional metal detection & x-ray inspection systems
- ✓ Displays all due diligence in the prevention of foreign body contamination
- ✓ Can be used to form part of HACCP and BRC procedures
- ✓ Contains no detachable parts, for added safety in controlled environments
- ✓ Available with or without a metal clip, and with blue or black ink

## PRODUKTINFORMATIONEN

**Ink Information:** Ink contains poly-alcohols and a mixture of dyes and synthetic resins. Ingredients conform to EN71 and are non-toxic. The ink is non-flammable and has a reactivity classification of stable.

**Ink First Aid:** In case of contact with eyes rinse immediately with water and seek medical advice. The ink may cause light irritations but should not cause permanent damage. In case of contact with skin, wash with warm soapy water.

**Metal Detectability**

The body of the Food Safe Metal Pen is manufactured from a combination of aluminium and nickel coated steel. These materials should be detectable by a correctly calibrated metal detection system / x-ray inspection system. Please note; this pen contains a standard plastic ink cartridge.

Niebling recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment may need to be recalibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.
