Product Specification Sheet

## Stainless Steel Clipboards |

## The Stainless Steel Clipboards

Our stainless steel products are manufactured from 304 grade stainless steel which is highly resistant to oxidation, rust, stain and corrosion with the added benefits of being strong, highly durable and easy to clean. However, some corrosives and excessive exposure to salt can still degrade 304 stainless steel. 304 grade stainless steel is the most commonly used food grade stainless steel; it is used in food, dairy brewing, hospital and sanitation applications.

## Stainless Steel Clipboards Advantages

- ✓ Detectable by in-line metal detection systems & x-ray inspection systems
- ✓ Food safe, hygienic metals
- ✓ 304 Stainless Steel boards, heavy duty and resistant to corrosion
- ✓ Strong, Durable and hygienic constructions
- ✓ Can be used as part of HACCP and BRC procedures
- ✓ Displays due diligence in the prevention of foreign body contamination

## Product and Packaging Information

A4 Portrait:	8900452
A4 Portrait w/ Hook:	8900456-E
A3 Landscape 1 Clip:	8900457-E
A4 Size:	227mm x 337mm x 1mm
A3 Size:	430mm x 350mm x 0.8mm
Clipboard Material:	304 Stainless Steel
Thickness:	0.8mm
A4 Weight:	0.65kg
A3 Weight:	1.05kg
Pack Size:	1
Detectability:	Metal & X-Ray Visible
Commodity Code:	73269098

*Please note; AF Stainless Steel clipboards are made with grade 304 stainless steel boards and grade 304 stainless steel clips. A3 Stainless Steel clipboards are made with grade 304 stainless steel boards and grade 430 stainless steel clips. The A4 Stainless Steel Clipboard with hanging hooks are made with grade 304 stainless steel boards, grade 304 stainless steel clips and grade 420 hanging hooks.*

## Safety Certificates / Approvals

BRC Compliant  
ISO 9001:2015

## Metal Detectability

The products manufactured from stainless steel – we would recommend using stainless steel test pieces to calibrate your equipment to detect stainless steel contaminants to your specification.

Niebling recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection systems.

The information provided in this product specification sheet is based on our experience and knowledge to date and we believe it to be true and reliable. This information is intended as a guide for your use of our products, the use of which is entirely at your own discretion and risk. We, Niebling Technische Bürsten GmbH, cannot guarantee favourable results and assume no liability in connection with the use of our products.
