

Product Specifications

| Revised March 2015

Product Name: Fish 2000

Product Description: The Fish 2000 disposable safety knife is moulded from metal detectable plastic and incorporates stainless steel blades. The knife features a primary safe use cutting blade, as well as a spring-loaded retractable hook blade at the rear of the knife. The primary blade is ideally suited for cutting strapping, paper, and plastic wrap material, whereas the pop-out hook blade is ideally suited for applications such as cutting box tape and cable ties.

Product Code: 8900502-B

Product Colour: Blue

Pack Size: 10 Pack

Product Advantages:

- ✓ Can be detected by conventional in line metal detection systems
- ✓ Simple design minimises any potential 'germ traps'
- ✓ Can be used for a variety of applications within hygiene critical processing environments
- ✓ Concealed blades minimise the risk of injury and drawing blood
- ✓ Displays a use of all due diligence in the prevention of foreign body contamination

Product Material(s): Metal Detectable Polypropylene and Stainless Steel

PRODUKTINFORMATIONEN

Metal Detectability

The Fish 2000 is moulded from an electromagnetically detectable plastic compound. The detectability of these materials will vary based upon the metal detection systems being used and their calibration. All components of this safety knife are manufactured from metal detectable polymers or stainless steel, making the product fully metal detectable. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason Niebling recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
