

## PRODUKTINFORMATIONEN

## Product Specifications

| January 2020

<b>Product Prefix:</b>	8900537-B
<b>Product Colour:</b>	Blue
<b>Pack Size:</b>	1 Knife
<b>Blade Length:</b>	55mm / 2¼ Inch
<b>Blade Options:</b>	Straight Blade – 8900537-B
<b>Handle:</b>	Textured Detectable Nylon Grip
<b>Product Advantages:</b>	<ul style="list-style-type: none"><li>✓ Detectable by conventional metal detection systems</li><li>✓ Highly visible blue colours for easy visual identification</li><li>✓ Effective for shrink wrap, strapping, netting and sacks</li></ul>

**Product Description:** The Detectable Pocket knife is made in Sheffield, England, using high quality stainless steel for the blade and metal detectable blue nylon for the handle. This multi-functional knife is ideal for packaging, netting and cutting open sacks in food processing environments.

The blade should be kept sharp by sharpening little and often on an oilstone or a sharpening steel at an angle of approximately 20° to the stone or steel. The edge should be drawn across the sharpener from heel to point, taking alternate sides, using firm steady strokes becoming lighter when finishing.

The knife should not be thrown, used as a lever, pry bar, hammer chisel or wedge. As an open blade knife extra care should be taken when working and especially when closing the knife.

## PRODUKTINFORMATIONEN

**Instructions:**

Keep the blade sharp. Keep the knife clean and dry. Keep the working parts lightly oiled using a good quality mineral oil. Always cut away from you. Use only for purpose for which it is intended. Don't throw the knife. Don't use as a lever, pry bar, hammer, chisel or wedge. Always work safely with tools and wear approved eye protection. Never use near live electrical circuits.

**Lock Instructions:**

This knife features a blade which locks into the open position to minimise the risk of it accidentally closing while in use. The lock is released by carefully pushing the locking-lever away from the base of the blade before folding the blade back into the handle.

**Metal Detectability**

The body of this knife is manufactured using plastic composite materials containing an evenly dispersed metal detectable additive. The detectability of these materials will vary based upon the metal detection systems being used and their calibration. All components of this safety knife are manufactured from metal detectable polymers or stainless steel, making the product fully metal detectable. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason Niebling recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
