Product Name: Detectable Glasses Cord

Product Description: A lightweight and comfortable push-on silicone cord for your spectacles. This circular cord will ensure your eyeglasses are held safely around your neck.

These fully metal detectable silicone glasses cords are manufactured using soft, flexible, silicone rubber containing an evenly dispersed metal detectable additive with a stainless steel clip. The cord is flexible and will push on to most spectacles with ease, once on you can secure with the adjustable metal spring on the adjustable version.

Product Code(s): Adjustable: 8901005-B
Non Adjustable: 8901006-B

Pack Size: 5 Pairs

Pack Weight: 0.01 Kg

Cord length: 710mm

Product Colour: Blue

Break Force: Approximately 17N of force is required to snap the cord. *Please note we recommend customers carry out their own testing and risk assessments.*

Product Material: Silicone containing a metal detectable additive and stainless steel clip/spring

Product Advantages:

- ✓ Detectable by conventional metal detection systems
- ✓ Highly visible bright blue colour for easy visual identification
- ✓ Displays all due diligence in preventing foreign body contamination
- ✓ Can be used to form part of HACCP and BRC procedures

PRODUKTINFORMATIONEN

Fitting Instructions

Grasp the stem of the cord and push onto the arm of the glasses until a secure, comfortable position is obtained.

Detectability

The Detectable Hair Tie contains a metal fastening clip which can be detected by correctly calibrated metal detection systems. The detectability of this material will vary based upon the metal detection systems being used and their calibration. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason Niebling recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
