Product Specifications

| January 2020

**Product Description**

Manufactured in Great Britain, this heavy weight mallet is designed to offer a heavier hitting force using metal detectable nylon caps, which are designed to wear and be replaced by hand. The caps are one piece injection moulded and do not contain any metal pegs or inserts to damage the workpiece when worn. Serrations in the metal head prevent the caps working loose and also feature a shoulder for extra strength and to prevent fracture from misdirected blows.

Colour Availability: White Handle & Blue Caps

Product Codes: Complete Mallet (each): 8990140-B
Replacement Caps (each): 8990024-B

Product Materials: White HDPE handle, Chrome plated Zinc cast mallet head, metal detectable Nylon replaceable caps.

Pack Size: 1

Product Features:

- ✓ Wearable, replaceable detectable caps
- ✓ 38mm / 1½" cap diameter
- ✓ 650g / 1.4Lbs overall weight
- ✓ 305mm / 12" overall length
- ✓ Reduced risk of contamination caused by loose or broken caps
- ✓ Ideal as a multipurpose striking tool in most light assembly and engineering applications

PRODUKTINFORMATIONEN

Metal Detectability

Mallet heads are manufactured using UHMW-Pe containing an evenly dispersed metal detectable additive. The detectability of this material will vary based upon the metal detection systems being used and their calibration. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason Niebling recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
